ABOUT ME

Dedicated Data Analyst and Business Intelligence professional with a strong foundation in economics and political science.

Leveraging Python and key libraries like Pandas, Seaborn, and scikit-learn, I excel in conducting insightful data analysis.
My expertise extends to machine learning projects, both supervised and unsupervised, and the development of neural networks using TensorFlow and Keras.

With a background in economics and political science, I bring a unique perspective to the field, combining analytical skills with a deep understanding of business dynamics.

My experience in the logistics sector has honed my ability to extract meaningful insights from complex data, contributing to informed decision-making and process optimization.

EMPLOYMENT HISTORY

Bootcamp Data analytics
September 2023- December 2023 (currently studying)

Bootcamp focused on data analysis, data collection and preparation through python and its most used libraries such as Pandas, SQL and exploratory data analysis.
